Layers of the Earth

Last week we began our study of the Earth’s Surfaces and the ways that it can be changed. We made a model of the earth with its layers: crust, upper mantle, lower mantle, outer core, and inner core. We learned that the upper mantle and the crust make up the Lithosphere. Our model was really fun to make because it was a cherry sour for the inner core, a marshmallow for the outer core, rice crispy treat mantle, and covered with magic shell for the crust. They were fun to make and some thought delicious to eat!

Academic Updates
Math: Place Value & Order of Operations
Weekly Story: Thunder Rose
