

MIDWAY ELEMENTARY

DIGITAL CITIZENSHIP WEEK OCT. 9-13

To ensure the online safety of students at Midway Elementary; a Digital Citizenship plan has been created to provide training to teachers and students on safe technology utilization and digital citizenship. Our goal is to educate Midway students about appropriate online behavior; having appropriate interactions with teachers, students, or other individuals on social networking sites or chat rooms; increase awareness on cyberbullying; and empower students to make choices online that are both intellectual and positive. Students will receive instruction regarding Online Safety, Cyberbullying, Digital Etiquette, and much more. Parents are welcome to come have a digital tour to see the digital learning and be instructed on keeping students safe online. The Library-Media specialists will cover lessons on digital citizenship throughout the school year to all classes with resources from Common Sense Media and NetSmartz.
