

# Digital Teaching & Learning

**Through the course of this pandemic, WSCD has significantly increase the amount of technology that we use to ensure access to all students.**

**The increased use of technology also comes with an increased need to educate students on appropriate online behavior.**

**Lately, we have noticed an increase in the amount of referrals from inappropriate technology use. Because of this, we would like to encourage parents to help us reinforce proper digital citizenship.**

**1**

## **ONLINE ACCESS**

Students should access the internet in a common space in the house where all members of the household can see the screen.

**2**

## **SCREEN LIMITS**

Parents can set limits on how much screen time their children have access to through ScreenGuide.

**3**

## **ACCOUNTABILITY**

Have regular conversations with you child regarding their online activities.

# **What parents need to know about their student's devices**

## **Device Filtering at Home**

The district installs and maintains an internet filtering software solution on all student devices in the district. This software solution is intended to block student access to all harmful and inappropriate websites and web-based content.

This filter is in effect on the student device no matter the location of or the connection used by the student to access the internet. While no solution is guaranteed to deny access to all such websites, the use of filtering software helps make internet use by students much safer.

Parents are encouraged to use ScreenGuide, which is provided by the school district. ScreenGuide will give parents the ability to designate the amount of time the iPad can be used at home, and control which apps can be used during non-school hours.

&

ScreenGuide

**ScreenGuide Parental Control app** allows you to set parental controls to limit the amount of time the school-managed iPad can be used at home, filter internet browsing with web filters, and control what apps can be used, and more. Visit <https://manager.mosyle.com/forparents> for more information.

To set up and start managing your child's school device, just follow the steps below:

1 Start by downloading the ScreenGuide app on your personal device—you can look for the app on the App Store (for iOS devices) or Play Store (for Android devices), or by visiting <http://screen.guide/download>.

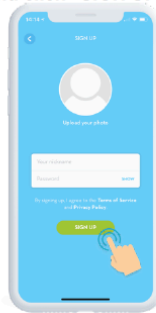

2

Enter your email to create your account.

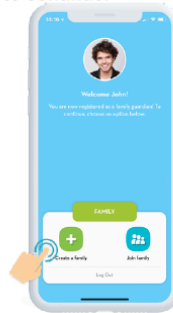

3

Fill out your account info and click "SIGN UP".

4

Click "CREATE A FAMILY" to continue.

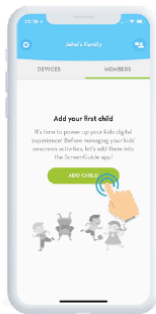

5

Type your family name and click "CREATE".

6

Next, add your child to your account.

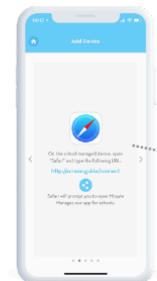

7

Select "I'm adding a school managed device".

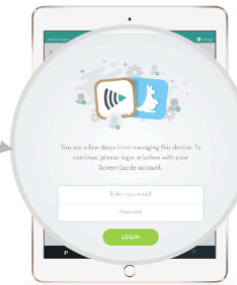

8

Using the browser on your child's device, access the highlighted bluelink.

9

You will be redirected to the Mosyle Manager app – enter your ScreenGuide login credentials:

Once you login with your ScreenGuide account info, within the Mosyle Manager app, you'll be prompted to enter a passcode in order to connect your child's school-managed device to your

**0208F**

ScreenGuide account. Enter the passcode shown here:
